## Introduction

Welcome to our 30th annual bull sale. We will be holding our sale under the usual auction system and will be using the ONLINE BIDR auction, live streaming the sale also. This will give prospective buyers and viewers the option of viewing the sale and also the opportunity to buy online. You will find instructions towards the back of the catalogue about how to register through the BIDR system, as you need to be registered as a buyer a few days before our sale day. On sale day you will need to log into BIDR with your user name and password and register for our Ruaview Simmental and Angus auction.

We have tried to describe the bulls as accurately as we can, by printing as much information as possible, including raw data, EBV's and Beefclass, in the catalogue lots. BeefClass is the only structural classification in the beef industry. If you don't measure, how do you know that you are improving.

With the beef schedule still holding up and the value of weaners very strong, it makes the value of selecting bulls to produce faster returns, through better carcass qualities, so important, and the use of cross breeding over your lesser types of cows can certainly lift the value of their offspring. "Keep lifting the bar to reap the rewards."

Our Simmental offering continues to perform superbly well and the first sons of Billa Park High Impact, all polled and powerful, absolutely amazing cattle. The Glen Anthony Executive and Potawa Finnegan sons all have excellent carcass qualities, and very good calving ease, with both horned and polled sons available.

The Angus line up of bulls have again performed well this year and are looking great. We continue to look for more growth and carcass, without any detriment to calving ease and milk. We continue to use Karoo Knockout K176, and his son, Ruaview KO 1912, who excels in body fats and all round quality. SS Brickyard covers all the bases of calving ease, small birth weight, massive growth and carcass. The Capitalist son Ruaview Capitalist 1921 has progeny looking outstanding.

With the very successful dispersal sale of all of our Simmental Females, next year will see the last of the Simmental bulls for sale, here at Ruaview. The Angus will continue with our breeding objectives unchanged, striving for an increase in performance, without compromising reproduction, along with genotype and improving phenotype, as one is of no use without the other.

BeefClass scores were by assessor - 5021, John, and EBV's published are as at March 2023  
Scrotal measurements are as at 11 April 2023

If you wish to view the bulls at any stage, to assist you in your breeding goals, please don't hesitate to contact us to arrange a convenient time, as it would be a pleasure to discuss your requirements.  
Phone 06 3858040 or 027 4314992

We wish you and your family safe health, and hope you can participate in the sale on farm or the online auction.

Thank you  
John & Helen

## **GUARANTEE**

RUAVIEW bulls are guaranteed for 2 years from the date of the sale against structural soundness, infertility or incapability of service. Under these circumstances, we will

-Replace the bull with a satisfactory substitute if available, or

-Issue a credit equal to the purchase price less the salvage value. This credit may be used at future RUAVIEW bull sales, or we will refund your credit.

This guarantee covers the purchase value of the bull without interest, costs or damages. The guarantee shall apply providing the bull's incapacity is not caused by injury or disease contracted since leaving the RUAVIEW property, that is calculated on the basis that the guarantee is reduced by one third of the purchase price for each year of standard service from the sale date. A veterinary certificate must be supplied by the purchaser upon request.

If any bull that is purchased does not possess a reasonable fertility, although not totally infertile, any dispute that may arise shall be settled by an arbitrator appointed by the auctioneers and must be lodged within 12 calendar months from date of sale.

## **HEALTH**

RUAVIEW bulls are examined by a veterinarian prior to sale day. This examination includes palpation of the sexual anatomy.

BVD-All bulls in this catalogue have been DNA tested, negative for BVD and vaccinated twice (15/03/23 and 18/04/23). All bulls have also been given a 7 n 1 vaccination (15/03/23), prior to sale which will cover you for the next 12 months. They should receive an annual booster thereafter.

All RUAVIEW bulls are Group Breedplan recorded, carcass scanned for Eye muscle, Fat and IMF.

TB STATUS at RUAVIEW is C10. The sale bulls tested clear 06/04/23.

## **OSH**

Every effort will be taken by the vendors, on the day of the sale as well as days of inspection, to ensure the safety of buyers and visitors. However, this farm is run under normal management conditions, therefore potential hazards exist with relation to livestock and the environment. Please take care to ensure your personal safety.

# BEEF-CLASS STRUCTURAL ASSESSMENT GUIDE

## Beef-Class Structural Assessment Guide

For docility: 1 is ideal (docile), 3 is less ideal (restless) and 5 is aggressive. (Scores of 1 and 2 are preferred).

For traits scored 1-9: 4 and 6 show slight variation from ideal but this includes most animals. Any animal scoring 4 and 6 would be acceptable in any breeding programme.

• 3 and 7 shows greater variation and would be acceptable in most commercial breeding programmes, but seed stock producers should be wary.

• 2 and 8 are low scoring animals and should be looked at closely before purchasing.

• 1 and 9 should not be catalogued and are considered culls.

Trait	Key	Scoring Range	
Docility	D	 2 3 4 	1. Docile 3. Restless 5. Aggressive
Front Feet Claw Set Rear Feet Claw Set	FC RC	  	1. Open/Divergent 5. Good 9. Scissor Claw
Front Feet Angle Rear Feet Angle	FA RA	  	1. Stubbed Toe 5. Good 9. Shallow Heel
Rear Legs Side View	RS	  	1. Straight 5. Good 9. Sickle Hocked
Rear Legs Hind View	RH	  	1. Bow Legged 5. Good 9. Cow Hocked
Front Legs Front View	FF	  	1. Bow Legged 5. Good 9. Knocked Knee
Udder Evenness	UE	1 2 3 4 5 6 7 8 9	1. Dropped Fore Qtr. 5. Good Balance 9. Dropped Rear Qtr.
Teat Size and Shape	TZ	  	1. Very Small/Thin 5. Good 9. Very Large/Bulbous
Sheath & Navel Score	SN	  	1. Pendulous 3. Good 5. Clean/Tight
Capacity	CP	 2 3 4 	1. Lacking Capacity 3. Medium 5. Large Volume
Muscle Score	LM	  	A. Very Heavy C. Medium E. Light

### Beef Class Explained

It has been recognised within the beef industry that there has been a substantial financial loss due to badly structured animals. Whether it is the bull being unable to serve, steers not being able to finish a long term feeding programme or cows with badly structured udders not being able to rear their calves properly, it has been costing producer's income. Ruaview Stud has always used the Beef Class structural assessment system. We believe this is still the most important aspect prior to any purchase, which is then combined with the EBV's to help complete the picture.

# Breeding Objectives

Establishing Breeding objectives, that you make on a bull selection, will influence your herd for the next 10-15 years. When selecting a bull to use in your breeding programme, you need to weigh up many factors. Some of these are listed below:

1. Your current herd performance
2. What specific Breeding Traits need to be addressed to increase your returns? What is your biggest problem that costs you the most financially?
3. The environment under which your herd is managed.
4. The market that you intend to aim for, being the weaner market or for finishing the cattle.
5. Are you looking for Maternal or Terminal sires?

Bull selection is frequently based on a gut feeling about the relative value of a range of traits. These traits include Fertility, Ease of calving, Growth, Structure, Carcass, Temperament, and others, but the Breeding Objective should be a balance of all the traits that will add profit to your operation.

Bulls should be fertile and have passed a bull breeding soundness evaluation, carried out by a Veterinarian . The bulls must be structurally sound to be able to increase mating ability, as bad legs and excessive angles will lead to early arthritis and severely restrict serving ability. They should also have good size testicles for semen production and storage.

With the use of EBV's and the increased attention to carcass conformation, along with other information given in sale catalogues, a balanced selection criteria can give your herd a significant lift in profit. This can come through as increasing weaning by 10% and increasing weaning weights 20KG in some instances. By increasing rib and rump fats in your breeding cows they are easier maintained. Decreasing calving problems by 5% can make a significant difference also. All of these areas can make a significant difference to profitability.

The selection decision is based on identifying which bull or bulls, from those available, with all relevant information, will meet the needs of your herd. The biggest bull may not always be the best bull.

By acknowledging where genetic and phenotypic improvements could be made in your herd, a clear direction for future profits can be achieved. You as a beef producer need to remain focused on traits that are heritable and of economic importance to your business.

Remember your Breeding Objectives should always be to improve your bottom line financially.

# Understanding EBV's

## Accuracy

An accuracy is presented with every EBV and is indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV's as more information is analysed for that animal or it's relatives. Accuracy below 75% should be considered low, however young bulls with performance data but no progeny will all have similarly low accuracies.

**Birth Weight EBV** (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value, the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV** (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV** (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV** (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV** (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. Scrotal size is an indicator of male fertility as expressed in semen quality and quantity. Higher(positive) EBV indicates higher fertility. SS is also positively associated with female fertility.

**Carcass Weight EBV** (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 750 days for Angus and 650 Days for Simmental.

**Eye Muscle Area EBV** (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 400 kg carcass for Angus and 300kg carcass for Simmental. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 400kg dressed Angus carcass and a 300kg dressed Simmental Carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs** (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcass) and are adjusted to a standard 400 kg carcass for Angus and a standard 300kg carcass for Simmental. These EBVs are indicators of the genetic differences in fat distribution on a standard 400 kg carcass for Angus and a standard 300kg carcass for Simmental. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV** (%) indicates genetic differences between animals for retail yield percentage in a standard 400 kg carcass for Angus and a standard 300kg carcass for Simmental. Sires with larger EBVs are expected to produce progeny with higher yielding carcass.

**Intramuscular Fat EBV** (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 400 kg carcass for Angus and a 300kg carcass for Simmental. Depending on market targets, larger more positive values are generally more favourable.

**Angus: Self-Replacing Index (\$)**- Estimates genetic differences between animals in net profitability per cow joined for a self-replacing commercial herd, targeting the production of grass finished steers. Steers are assumed marketed at 525 kg live weight (280 kg carcass weight and 10 mm fat depth) at 16 months of age.

**AngusPure Index(\$)** – Estimates genetic differences between animals in net profitability per cow joined for a self-replacing commercial Angus herd, targeting the production of grass finished steers for the AngusPure programme. Steers are assumed marketed at 525 kg live weight (280 kg carcass weight and 10 mm fat depth) at 18 months of age with a significant premium paid for marbling.

Note that \$Index values for individual animals are sensitive to the assumptions used in the BreedObject analysis to calculate the selection index. More information is available on the weightings used in the New Zealand Angus Selection Indices.

## Accuracy

**Accuracy** (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower

the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

Accuracy range	Interpretation
less than 50%	EBV should be considered as a preliminary estimate. It could change substantially as more performance information becomes available.
50-74%	Medium accuracy, usually based on the animal's own records and pedigree. Still subject to substantial changes with more information, particularly when the performance of progeny are analysed.
75-90%	Medium - high accuracy and includes some progeny information. Becoming a more reliable indicator of the animal's value as a parent.
more than 90%	High accuracy estimate of the animal's true breeding value. It is unlikely that the EBV will change much with the addition of more progeny data.

**As a rule, animals should be compared on EBVs regardless of accuracy.** However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

#### **Genetic test status**

**AMFU:** The animal is expected to be free of the mutation responsible for Arthrogryposis Multiplex (AM) but has not been tested.

**NHFU:** The animal is expected to be free of the mutation responsible for Neuropathic Hydrocephalus (NH) but has not been tested.

**CAFU:** The animal is expected to be free of the mutation responsible for Contractural Arachnodactyly (CA) but has not been tested.

**DDFU:** The animal is expected to be free of the mutation responsible for Development Duplication (DD) but has not been tested.

# ANGUSPURE PARTNER STUD

AngusPure NZ has teamed up with 88 Angus studs who share in our vision - to focus on the end consumer. This stud is proud to be named as one of them, and by using the finest genetics and implementing best management practice they can help you produce more premium quality Angus beef.

Only our AngusPure Partner studs display these devices in their sale catalogues. They indicate bulls endorsed by AngusPure NZ.

## ANGUSPURE ENDORSED BULLS

AngusPure NZ continues to endorse bulls for sale that are either at or above +\$125 for the AngusPure index (API) and at or above \$115 for the AngusPRO index (PRO). These indexes give commercial farmers confidence that by using these selection tools, bulls are most likely to leave progeny with superior carcase quality. At the same time they achieve desirable outcomes for self replacing herds, as the AngusPure & AngusPRO indexes still reward cattle with strong maternal attributes like calving ease, scrotal and growth, along with carcase weight.

**To qualify, bulls will be => +\$125 for AngusPure index OR => +\$115 for AngusPRO index**

## EXTRA ANGUSPURE ENDORSEMENT FOR MARBLING

In addition to the 'A', and to assist bull buyers who wish to select for more marbling AngusPure are rewarding those animals that are either at or above +\$145 for the AngusPure index and at or above \$135 for the AngusPRO index. In addition to this they must have an IMF EBV (for marbling) equal to or greater than +2.2. These bulls will be awarded an 'A+' endorsement. Marbling is one of the very highest eating quality attributes and is necessary in order to meet some of the highest premium requirements for the export program, AngusPure Special Reserve.

**To qualify, bulls will be => +\$145 for AngusPure index OR => +\$135 for AngusPRO index, and in addition all bulls must be => +2.2 for IMF EBV**

AngusPure NZ recognises the need to lift the amount of marbling in our New Zealand cow genetics, in order to fill the requirements of consumers going forward. Marbling has two critical components; genetics and feeding. Feeding on a rising plane of nutrition is vital but without the genetics these attributes will not be able to express themselves.

## REFERENCE SIRES

### **A** Ruaview Capitalist 1921

A very stylish bull. He offers length, depth, width and docility. A very complete package. Was used over heifers and tailed up after the AI Programme. His progeny are very attractive and showing enormous potential.

#### April 2023 Angus BREEDPLAN

	Calving Ease Dir (%)	Calving Ease Dtrs (%)	Gestation length (days)	Birth Wt (KG)	200 Day Wt (KG)	400 Day Wt (KG)	600 Day Wt (KG)	Mat Cow Wt (KG)	Milk (KG)

	+1.2	-5.3	+67	+9.8	+0.8	+0.9	+1.0	+0.1	+10

### **A+** Ruaview KO 1912

A Very balanced bull with great length, deep muscling and great spring of rib. He is very docile.

We were hoping to find a Knockout son to use and this is the one. The easy doing of his progeny, is remarkable. He also has exceptional fats.

#### April 2023 Angus BREEDPLAN

	Calving Ease Dir (%)	Calving Ease Dtrs (%)	Gestation length (days)	Birth Wt (KG)	200 Day Wt (KG)	400 Day Wt (KG)	600 Day Wt (KG)	Mat Cow Wt (KG)	Milk (KG)

## REFERENCE SIRES

### A+ SS BRICKYARD

Brickyard has a fantastic spread of numbers in his EBV's with excellent calving ease, extremely small birth weight, and then on to incredible growth. He has very good EMA and IMF. His progeny scanned well with very high body fats, which don't reflect in his EBV's.

#### April 2023 Angus BREEDPLAN

	Calving Ease Dir (%)	Calving Ease Dtrs (%)	Gestation length (days)	Birth Wt (KG)	200 Day Wt (KG)	400 Day Wt (KG)	600 Day Wt (KG)	Mat Cow Wt (KG)	Milk (KG)

	+1.3	-5.0	+83	+9.4	-0.5	-0.2	-0.0	+2.9	+16

### A+ KAROO KNOCKOUT K176(AI) (IMP AUS)

Knockout is producing progeny with superior capacity & muscling, combined with very good structural soundness, and amazing docility. He also has a shorter gestation length and a lot of body fats. He has very good IMF. He is a trait leader for calving ease, daughters. His first daughters in the herd are outstanding.

#### April 2023 Angus BREEDPLAN

	Calving Ease Dir (%)	Calving Ease Dtrs (%)	Gestation length (days)	Birth Wt (KG)	200 Day Wt (KG)	400 Day Wt (KG)	600 Day Wt (KG)	Mat Cow Wt (KG)	Milk (KG)

	+0.9	-2.1	+79	+5.0	+1.5	+0.5	-0.4	+3.6	+9

### BILLA PARK HIGH IMPACT H186

We found this polled bull in Australia, and we viewed High Impact and his standout progeny at Billa Park. We have used him as much as possible. His semen has been of average standard, so conception rates aren't great. Almost all progeny are polled with only 2 being scurred. The early development and power of these progeny are simply outstanding. Big capacity, big boned and very good muscle volume, makes for a very exciting future. His EBV's are very solid across all departments, with positive calving ease, a lot of growth and positive fats.

#### April 2023 SIMMENTAL BREEDPLAN

	Calving Ease Dir (%)	Calving Ease Dtrs (%)	Gestation length (days)	Birth Wt (KG)	200 Day Wt (KG)	400 Day Wt (KG)	600 Day Wt (KG)	Mat Cow Wt (KG)	Milk (KG)

**FOUR WORLD-FIRST FORMULAS.  
THREE TARGETED STAGES OF GROWTH.  
AND A WEALTH OF KIWI INGENUITY IN EVERY COMBINATION.**

## **TURBO® CATTLE DRENCH PROGRAMME**

### **STAGE 1**

**TURBO® Initial  
Oral Drench**

First oral drench treatment for weaned calves. Protect against worm parasites and bridge the gap between removal of coccidiostat meal and natural coccidiosis immunity.

### **STAGE 2**

**TURBO® Advance  
Oral Drench**

Routine treatment of growing cattle that can be drenched orally. Can be used in cattle under 120kg.

### **STAGE 3**

**TURBO® Pour On  
or Injection**

Routine treatment for growing cattle that are too big to be drenched orally. Rain resistant pour-on and injectable options with the added benefit of lice control.

**alleva.co.nz**

TURBO® is a registered trademark of Alleva Animal Health Ltd. TURBO Pour-on (A011722), TURBO Injection (A011742), TURBO Initial (A011703) and TURBO Advance (A011714) are registered pursuant to the ACVM Act 1997. # 14 DAYS FREE COVER. NO BULL.

We want to ensure you get the very best cover on sale day and the best service every day after that. That's why we offer to insure your bull purchased at any **FMG Premier Bull Sale** for 14 days free\* from the fall of the hammer.

**Extend your cover.** All bulls purchased at auction up to \$50,000 can be insured for 6.5% of the purchase price on a 12-month policy. You can choose to extend your 14 days free cover on the Purchaser Instruction and Insurance Slip. For terms less than 12 months, different rates apply.

So talk to your FMG Rural Manager about FMG Premier Bull Sales Insurance.

\* Subject to standard underwriting criteria. Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wording at [fmg.co.nz/livestockpolicy](http://fmg.co.nz/livestockpolicy)

*We're here for the good of the country.*

**FMG**  
Advice & Insurance

# FMG Premier Bull Sale Insurance

## What is FMG Premier Bull Insurance?

FMG provides automatic insurance for all bulls auctioned at a FMG Premier Bull Sale up to the value of \$50,000 for 14 days at no cost to the purchaser. For any bull purchased over \$50,000 talk to an FMG representative.

## What is the length of cover?

You will automatically be insured for the specified bull for 14 days. You also have the option to extend the length of insurance to 12 months. Simply tick the "Extend your Premier Bull Insurance" option on the Purchaser Slip. The specified bull is then insured for the remaining period of 12 months at 6.5% of the purchase price. If you would like to discuss an alternative timeframe, please have a chat with your local FMG representative.

You don't have to pay today, FMG will invoice you for this additional cover.

## What are the benefits?

✓ <b>infertility</b>	Cover if your specified bull has to be euthanised due to permanent infertility caused by certain accidents, disease, or illness.
✓ <b>Theft or death</b>	We cover your specified bull for theft or death caused by certain accidents, disease, or illness (including while in transit anywhere in New Zealand).
✓ <b>vet costs</b>	We cover up to \$500 for treatment of your specified bull to prevent death.

## What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

Please note this is only a summary of the product and is subject to our specific product documentation. For full details, you should refer to the policy document. You can get these documents, and any other information you need, from your FMG representative, by calling us or visiting: [fmg.co.nz/livestockpolicy](http://fmg.co.nz/livestockpolicy)

## **CONDITIONS FOR BULL AUCTIONS CONDUCTED LIVE AT A SALEYARD/ON FARM**

All intending purchasers must register at the PGG Wrightson Ltd Livestock (PGW) sales office prior to the sale.

The New Zealand Stock & Station Agent's Association Conditions of Sale apply. These terms can be inspected at the registration desk and on the wall in the auction room.

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW's Monthly Account Terms of Trade are also available online at:

[www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions](http://www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions)  
or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 5% of the purchase price excluding GST, plus GST, to livestock companies and recognised independent livestock agents with a PGW Monthly Account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

## **CONDITIONS FOR BULL AUCTIONS CONDUCTED ON bidr®**

All intending purchasers must register online at [www.bidr.co.nz](http://www.bidr.co.nz) prior to the sale.

bidr®'s Conditions of Sale and Terms of Use apply. These terms can be inspected at <https://bidr.co.nz/content/user-terms-conditions>

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW's Monthly Account Terms of Trade are also available online at:

[www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions](http://www.pggwrightson.co.nz\Our-Company\Terms-and-Conditions)  
or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 5% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account that are also Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

## **CARING FOR YOUR NEW BULL.**

Buying a bull, is an investment, to help improve the quality and profitability of your herd for many years to come.

To get the most from your new bull it pays to look after him well. When he arrives home, have a few quiet steers or cows for him to run with. The bulls have just been taken out of their group. Even normally quiet bulls can get agitated and may take a while to adjust. Talk to them quietly, handle them quietly, no dogs, give them room to move as everything is new. Make sure he has a water trough available as RUAVIEW bulls have had only trough water-NOT dam water. Feed a bit of hay for a few days for the bull to get accustomed to you, your bike, and your dogs.

It is very advisable to continue with annual inoculation of the bulls initial vaccination programme. This refers to 7 n 1, and BVD.

Feed your bull well. A worm drench 8 weeks prior to mating and immediately after mating can be very beneficial.

RUAVIEW bulls are used to being handled by motorbikes. All our fences are electric.

---

**We would both like to thank you for attending our bull sale, either in person or on line, and your trust and belief in our breeding programmes.**

**We would also like to thank Ruapehu Vet Services, for the use of their mobile BBQ and their support throughout the year.**

**We would also like to thank Tod Barrell from Alleva for his support each year at our Bull Sale.**

**Kind regards  
John & Helen Hammond**

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering - please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

**Alternatively, contact your local bidr® representative:**
