Introduction

Trying to ease the workload as we move through life, it is certainly with mixed emotions that we put out this catalogue together for the complete dispersal of all the females, here at Ruaview. The bull calves will be retained for our annual sale along with our Angus herd.

Having been passionately breeding Simmentals now for 30 years, it certainly has been a huge part of our lives and being involved with all things Simmental has given us many rewarding and lasting memories and friendships. Being awarded a life membership for services to Simmental New Zealand, was very humbling.

We have exhibited Simmental cattle at Royal shows, A & P shows and Beef Expo, and entered the Steak of Origin, with many successes. John has also had numerous judging appointments, Beefclass training, and Beefclass Structural Assessment jobs have been real highlights.

Our first purchases were from the Ailsa Stud back in 1992, of which our "P" family originates. And then from the Wai-iti Stud with 2 or 3 still remaining. The successful purchase of Singing Hills Helen from Barry and Dot Andersons herd, was the dam of Ruaview Scotch who we had success with at Beef Expo in 2008, being Supreme Simmental Champion and Reserve All Breeds Champion. This followed on with a Grandson of Ruaview Scotch, being Ruaview Pinetree, who became Supreme Champion Simmental in 2016. Another significant purchase was from the Terrilynne Dispersal Sale of Lynne Sloanne, which has led to our "M" family.

To the cattle breeding side, it has always been challenging to find genetics to move forward, and many bulls have contributed to where we are today. Deutsche Loch, Wai-iti Loch Lomond, Glen Anthony Sgt Pepper, Woonallee Hadau, Moneymore Kiwi Kid, MF Fitzy, Glen Anthony Y-Arta, Glen Anthony Executive. The recent introduction of Billa Park High Impact, and Woonallee Phar Lap, will both leave a lasting and positive legacy in the future.

As with our selections, which are based on Production and Reproduction, the cattle must possess all the positive and necessary attributes to enter the herd for breeding. Most Sires that have been used lately are polled, as we have been moving to polled cattle for some time, but not polled for the sake of being polled, as it all takes time to keep the cattle in balance.

As the calves are not yet weaned, the bull calves are for display purposes only with their mothers, EXCEPT LOT 30 which is the only bull calf for sale, Sired by Woonallee Phar Lap out of Micky a Pinetree daughter (Lot 29)

The future of Simmentals in New Zealand, we believe is still of significant value, not just as a beef breed but the addition of the (Fleckvieh and Montbeliarde) milking Simmental is massive and only in its infancy. We believe that within 5-10 years milking Simmental will become one of the significant Milking Breeds in New Zealand. Simmental dairy beef calves are highly sought after now and this will aid in the benefits of the Simmental Breed in New Zealand.

All the cows and heifer calves are for sale, minus a couple of culls, and older cows, which are at the end of their productive life, which offers all breeders and commercial operators a marvellous opportunity to add proven genetics and performance to their existing herd or the start of a new herd.

We thank you for supporting us at our Dispersal Sale, and wish you well with your purchases. We continue to be interested in Simmental, and will stay interested in where our cattle have gone.

Thank you all.
John & Helen

To view the cattle for sale at any stage, this is by appointment. Phone John 027 4314 992 or 06 385 8040 for a suitable time.

SIMMENTALS FEMALE DISPERSAL SALE

The Simmental Breed Society is now in its sixth decade of breeding cattle in New Zealand and before going on further we should briefly look at those 50 plus years and the impact their cattle have had on NZ farming. The Society was founded by breeders who had an entrepreneurial and innovative spirit and a desire to improve the tradition cattle of New Zealand that were lacking the ability to grow on and finish to heavier weights, no doubt a legacy of the British chiller trade of the post war resurgence in farming. That the earlier breeders, some long past, were able in the first thirty years to the turn of the century take the Simmental Breed to the third largest beef breed in this country is a credit to their dedication and commitment and belief that they were breeding cattle that were an improvement and superior to what we had. This was reinforced by the benefits that the commercial users of Simmental genetics were getting both in the saleyards and at the freezing works. To this end and impressed by results gained by using Simmentals at home in a crossbreeding situation John & Helen started the Ruaview Simmentals Herd [1558] in 1992.

The foundation and the breeding history of the Ruaview herd is covered in an abbreviated form in John's foreward, highlighting both showing and selling success at Beef Expo and in the A & P show ring. These successes are significant, as is testified by the genetics used and the number of Ruaview influenced pedigrees throughout the breed. Judicious use of performance backed new blood, backed by the most stringent of structural and temperament criteria has ensured that the cattle on offer are of the highest order. Phenotypically the females are lovely soft easy doing, deep ribbed, very sound and of an incredible disposition. Remember, these cattle are bred at Ohakune in the coldest part of the North Island, so will shift anywhere and in particular to the South.

It will be sad to see the Ruaview prefix exit the Simmental breed as John has been an extremely busy and active Council member, but importantly has been most particular in the type of cattle he has aspired to breed. The respect that he has among fellow breeders and more importantly his commercial clients and farmers testifies to his skill as a breeder of sound functional cattle that will thrive and do in any environment, and as that of a top stockman. Whether an existing breeder, looking for the odd choice female cow or somebody looking for foundation females for a new stud, the Ruaview dispersal offers a marvellous opportunity to purchase, and one that will not be replicated this year. This is a capital stock complete dispersal and carries our highest recommendation. We look forward to seeing you all at Ruaview on Wednesday 1st March; you will not be disappointed!!

Kind regards,

Bruce Orr; MNZM

Comments:

Pinetree was the supreme Champion Simmental at Beef Expo in 2016 and sold to Garry and Julene McCorkindale's Glenside Simmental Stud. Pinetree has been used through AI and has really left his mark in our herd. Many sons sold through our annual sale and the females continue on well as the Y-Arta progeny have. Explosive early growth and the majority have been polled.

Comments:

Ruaview Powerhouse is Hetro polled . He is out of an excellent Fitzzy daughter, giving more diversity to our programme. Powerhouse is slightly taller and has a more open frame. He has a lot of muscling and is deep ribbed. He is polled and super quiet with very good EBV data.

Comments:

We found this polled bull in Australia, and we viewed High Impact and his standout progeny at Billa Park. We have used him as much as possible. His semen has been of average standard, so conception rates aren't great. Almost all progeny are polled with only 2 being scurred. The early development and power of these progeny are simply outstanding. Big capacity, big boned and very good muscle volume, makes for a very exciting future. His EBV's are very solid across all departments, with positive calving ease, a lot of growth and positive fats.

Comments:

With the expensive purchase of only 20 straws of semen from the Gold Creek sale it was imperative we only mated him to the best breeding cows in the herd. The progeny we have has certainly exceeded our expectations. Glen Anthony Y-Arta did a great job in our herd and having a Grandson, Phar Lap, as well will be rewarding. Phar Lap will certainly be a bull of significance in New Zealand in the next few years. Take note of his amazing docility of +53. This certainly is reflected in his progeny.

Comments:

Ruaview Henry is Homo polled. He has always been a stand out. His 400 day performance is amazing being 100Kg ahead of all his peers. While not a tall bull, his thickness, volume and bone for a polled bull is staggering, which is what we have used Billa Park High Impact for. His Dam, Honor, is certainly developing into a top breeder. A Great Grandson of Glen Anthony Y-Arta.

Comments:

With the style and performance of Glen Anthony Executive's daughters, we used Ruaview Husky over the in calf heifers and all cows after A.I. His calves are looking great with many displaying the extra EMA he carries at +5.0 (twice the breed average). His structure and docility was outstanding.

Comments:

12th consecutive progeny. (5 Sons sold at our annual Bull sale. 3 Daughters active in the herd and 2 more on the way). This calf by Phar Lap is a real ripper. Super quiet, as are all Phar Lap progeny, makes Penny AL5 a real must have. A real stand out.

CONDITIONS FOR AUCTIONS CONDUCTED LIVE AT A SALEYARD/ON FARM

All intending purchasers must register at the PGG Wrightson Ltd Livestock (PGW) sales office prior to the sale.

The New Zealand Stock Station Agent's Association Conditions of Sale apply. These terms can be inspected at the registration desk and on the wall in the auction room.

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW's Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 5% of the purchase price excluding GST, plus GST, to livestock companies and recognised independent livestock agents with a PGW Monthly Account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

CONDITIONS FOR AUCTIONS CONDUCTED ON bidr®

All intending purchasers must register online at www.bidr.co.nz prior to the sale.

bidr®'s Conditions of Sale and Terms of Use apply. These terms can be inspected at <https://bidr.co.nz/content/user-terms-conditions>

PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW.

The current versions of PGW's Monthly Account Terms of Trade are also available online at: www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 5% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account that are also Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

This sale will be hosted by bidr® (bidr.co.nz) as a HYBRID ON-FARM auction, with online bidding and a live-stream available for online purchasers.

All intending online purchasers must register with bidr® using an account held with one of the bidr® partner agencies in advance of the sale date.

The bidr® team is available to assist intending purchasers with signing up and registering - please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point.

Alternatively, contact your local bidr® representative:

HEALTH

All calves have been tested clear of BVD (With the cows having been already tested) and inoculated with 7 in 1 on 6/1/23, and will have their second inoculation before sale.

The whole herd TB test was on 26/5/22 and had a clear result. We are a C10 herd.

TRUCKING

As the calves are not yet weaned but will be immediately after sale day, no trucking will happen before 15/3/23 to allow time for the calves to settle down after weaning and the cows to dry off properly. Post sale our preferred trucking company will be Tim Coombs, who offers a fantastic service, handling Stud stock frequently.

OUR TAG SYSTEM EXPLAINED

The yellow tag in the cows left ear are their birth/Tag number, and the green tag is their pedigree with the Sire at the top, Dam in the middle and Cow name at the bottom. This is because I refer to the cows as names not numbers.

OSH

Every effort will be taken by the vendors, on the day of the sale as well as days of inspection, to ensure the safety of buyers and visitors. However, this farm is run under normal management conditions, therefore potential hazards exist with relation to livestock and the environment. Please take care to ensure your personal safety.

NOTES

THANK YOU

TO ALL SIMMENTAL BREEDERS

For a lifetime of wonderful memories.

Please join us after the sale for a BBQ and
refreshments.

John and Helen
